Examples of assistive technology products for people with visual impairments:

Braille embossers/printers
Braille-to-text translation software
Braille music translation software
cursor enlargers CCTV
note takers screen magnifiers/large print scanners/reading systems
screen readers tactile image generation/enhancement
voice synthesizers web browsers

DEFINITION AND ELIGIBILITY CRITERIA FROM APPENDIX A OF THE MISSOURI STATE PLAN

Visual Impairment/Blindness Definition

Visual Impairment, including blindness, refers to any an impairment in vision that, even with correction, adversely affects a child's educational performance. The term includes both partial sight and blindness.

Criteria for Initial Determination of Eligibility

A child displays a Visual Impairment when:

A. A visual impairment or a progressive vision loss has been diagnosed by an optometrist or ophthalmologist:

B. Visual acuity has been determined to be:

1) for visual impairment, of 20/70 to 20/200 in the better eye with best correction by glasses;

2) for blindness, of 20/200 or less in the better eye after best correction by glasses or a visual field measuring 200 or less.

C. The visual impairment adversely affects the child's educational performance.
