St. Joseph Institute for the Deaf

1300 Strassner

Brentwood, MO 63144

636-532-3211 voice/TTY)

www.sjid.org

St. Joseph Institute for the Deaf provides educational programs for children from birth to 8th grade and their parents.

Clinical services are included in the cost of tuition and the school also provides services to adults of all ages who are hard of hearing. These services include audiology, and hearing aid/cochlear implant assessments. We believe people who are deaf or hard-of-hearing deserve the opportunity to hear, speak and read. Our staff includes certified AG Bell

LSLS (leaders in listening and spoken language) members, Speech/Language Pathologists and PhD certified audiologists. Our facility encompasses an Outreach Service to schools whose students live too far from our Chesterfield, MO, location where we are located. Outreach allows a trained professional to travel to other locations and assist students and teachers alike. In addition, St. Joseph Institute provides an online Internet Therapy Program called ihear as well.

St. Louis Catholic Deaf Society

www.stlcds.org

Speech-Language-Hearing Clinic

St. Louis University

Communication Sciences & Disorders

McGannon Hall

3750 Lindell Blvd.

American Speech-Language-Hearing Association (ASHA)

www.asha.org

Journals, guide to professional services, brochures for parents, educators and therapists.

National Institute on Deafness and Other Communication Disorders (NIDCD)

www.nidcd.nih.gov

Some Choices in Communication

- American Sign Language (ASL) — a visual language that has its own vocabulary, idioms, grammar and syntax; elements consist of the handshape, position, movement and orientation of the hands to the body and each other
- Finger spelling — using a manual alphabet to "write in the air"; more typically used to augment American Sign Language, as in spelling proper names and terms for which there are no signs
- Manual English — the vocabulary of ASL and finger spelled words presented in English word order resulting in a Pidgin Sign English (PSE)
- Oral Communication — the use of speech, residual hearing and speechreading as the primary means of communication

Parent Handbook — Section IV

- Speechreading — recognizing spoken words by watching the speaker's lips, face and gestures
- Cued Speech — system in which eight hand shapes in four possible positions supplement the information visible on the lips; the hand cue signals a visual difference between sounds that look alike on the lips
- Simultaneous Communication — the combined use of speech, signs and finger spelling; offers the benefit of seeing two forms of a message at the same time
- Total Communication — philosophy that implies acceptance and use of all possible methods of communication

(from the National Information Center on Deafness)

A. A hearing impairment has been diagnosed by an audiologist;

B. The hearing impairment adversely affects the child's educational performance.

DEFINITION AND ELIGIBILITY CRITERIA FROM APPENDIX A OF THE MISSOURI STATE PLAN

Hearing Impairment and Deafness Definition

“Hearing Impairment” means an impairment in hearing, whether permanent or fluctuating, that adversely affects a child’s educational performance, but is not included in the following definition for deafness.

"Deafness" means a hearing impairment that is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification, that adversely affects a child’s educational performance.

Criteria for Initial Determination of Eligibility

A child displays a Hearing Impairment when:
