

Special School District of St. Louis County

Communication Sequence

For Parents/Guardians of Students Who Attend SSD Special Education Schools

At SSD, we believe that open lines of communication with parents/guardians are essential for student success, and that communication should be as easy as possible. To that end, if you have a question, concern, suggestion or request about your child and the services he or she receives at an SSD special education school, please follow the communication sequence outlined below.

A Note About Special Education Services and SSD Technical High Schools

SSD operates two technical high schools. If you have questions about the special education services your child receives from SSD and your child:

- Attends half-day at North Technical High School or South Technical High School and half-day at his/her home high school, please follow the communication sequence for partner districts.
- Attends full-day at North Technical High School, please contact North Technical High School Principal Jim Hieger at 314.989.7600.
